

COMP213 - ASSIGNMENT #1

Instructions

Create an HTML document named **index.html** that will be used as your home page on studentweb.

Requirements

The page should include the following specifications (10 marks):

The page should include everything required for a well-formed HTML document. This includes:

- a valid document type declaration
- a head element with title element as a child
- a body element
- A <header> tag to indicate the header area that includes a <h1> tag containing your name (1)
- A <main> tag to indicate the main area of the page that includes:
 - An <h2> tag containing the course code and the current semester.
 - A <section> tag to indicate a section that contains:
 - A <h3> tag containing the words "My Favourite Activities"
 - a bulleted list of at least 3 favorite activities to introduce yourself to the visitors of your home page.
- A <footer> tag to indicate the footer section of the page that includes your name and student number
- Include a HTML comment showing your name and student number.

You **must** name your file **index.html** and upload it to the root folder belonging to you on studentweb.
