COMP213 - ASSIGNMENT #2

Instructions
You will create an updated version of your homepage in this assignment.
You will:
- Add an image to your homepage.
- Add styling to your homepage by creating a CSS file named style.css and writing styling rules for elements on your homepage.
- Validate your CSS file, then upload your style.css file to your personal folder on studentweb.

Requirements
- Add an image to your homepage after the section element in your website using the image element. Don't forget to include the alt, width, and height attributes.
- Link the style.css external stylesheet to your index.html document
- Provide a background color using hex values to the body element of your website
- Provide a width of 500px and height of 100px to the header element of your website and center the text within the header
- Provide a 1px dashed black border on the header element of your website
- Change the bullet style of the unordered list on your website to squares
- Change the font-family of the h2 element on your website to a sans-serif font-family
- Add a style to make the text in the footer element uppercase
- Generate and link a favicon for your website
- Update your website by uploading your updated index.html, css file, and favicon to the root folder belonging to you on studentweb. You will have to overwrite the existing index.html file
